**CREATE A
CLEAN &
CONSISTENT
BORDEREAUX
DATABASE**

WHAT IS BDX VIEW?

MGAs and insurers need clean and accurate policy data.

In a world with millions of data points being generated, capturing and organising the ones that are important to you is a challenge.

BDX View converts messy and inconsistent bordereaux into a central, clean & manageable database.

Instantly see all of your business in one place.

BDX VIEW
BY VOUNDER

UPLOAD

Upload bordereaux files from any source. BDX View's user-friendly interface ensures a seamless and secure transfer process, saving you time and reducing errors.

CLEAN

BDX View collates, cleans and standardises your data. Our algorithms and automated workflows identify inconsistencies, errors, and duplicates.

CONSOLIDATE

Streamline the consolidation of your bordereaux into a unified & organised database. BDX View is built to handle the dynamic nature of a modern insurance company and adapts as your business evolves.

EXPORT

Export your borderaux database to the format of your choice. Whether it's for reporting, analysis, or sharing with stakeholders, BDX View can be configured to fit your environment.

WHY USE BDX VIEW?

1 CONSOLIDATE MISMATCHING DATA SOURCES

Process inconsistent input data into a clean and secure database. See the whole picture in one place.

2 AUTOMATICALLY SPOT ERRORS

Get instant feedback to let you know of any errors or missing data. Remove the risks that come with inaccurate data and reduce nasty surprises by bringing your data processes into one streamlined database.

3 POWER UP YOUR TEAM

BDX View is designed for teams that don't have an army of data scientists in the background. Create datasets that quickly plug into powerful data visualisation tools such as PowerBI or Tableau. Increase your ability to scale without adding back office resource.
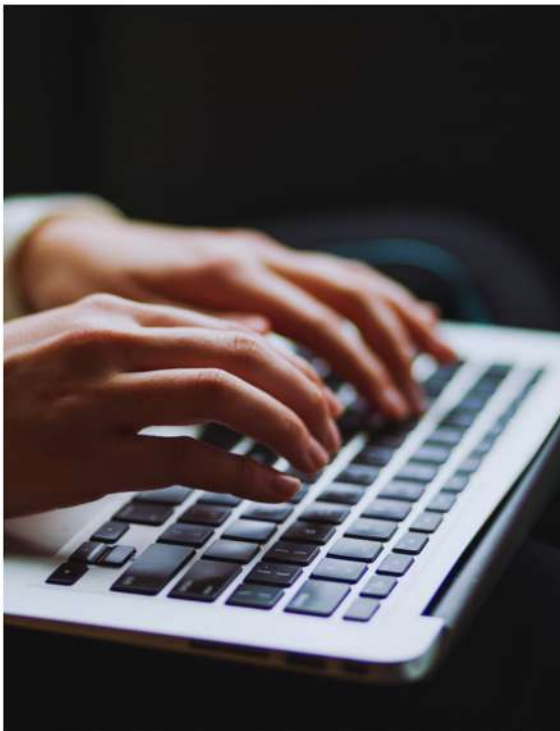

SECURE & SIMPLE

IS IT SECURE?

Yes. BDX View, hosted on Amazon Web Services (AWS), is meticulously designed with robust security measures to ensure the confidentiality, integrity, and availability of your data. Please refer to our Security Specifications document for full details.

WILL WE NEED TO DO LOADS OF DATA PREP?

No. BDX View is built for messy spreadsheets. Access is via an online login and the data is uploaded and downloaded in a simple user interface.

If you'd like to discuss using our API feed we're happy to discuss technical details with your team!

DATA, SIMPLY COMMUNICATED

Have all of your business' most important data in one place.

SCALABILITY

Create a secure, affordable and scaleable database that provides a great foundation for data-driven insights.

CLEAR INSIGHTS

Enjoy best-in-class data insights without introducing key person risk or needing an army of data scientists.

ABOUT VOUNDER ANALYTICS

We're a team of data engineers, actuaries and insurance professionals specialising in building bespoke insurance data systems using standard-market softwares.

Our mission is to enable organisations to make better evidence-based decisions — quickly.

We were fed-up with manually adjusting input data every month, so we created BDX View to do it for us.
